PROFESSIONAL SUMMARY

Analytical and detail-oriented Full Stack Software Developer with over 1.5 years of hands-on professional experience building, testing, and maintaining web and mobile applications using **React, Angular, JavaScript/TypeScript, Java, and PHP**. Experienced in delivering scoped features, debugging production issues, optimizing relational database queries (**PostgreSQL, MySQL**), and working with **RESTful/JSON APIs** in Agile teams with Git pull requests and senior code reviews. Proficient in leveraging AI-assisted coding workflows and agentic development systems with human review, testing validation, and technical documentation.

TECHNICAL SKILLS & TOOLS

- **Frontend & Mobile:** React, React Native, Angular 15, JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Backend & APIs:** Java (Spring Boot, Maven), PHP 7+, RESTful APIs, JSON, Layered Architecture
- **Databases:** PostgreSQL, MySQL, Relational Data Modeling, SQL Query Optimization
- **Engineering & Quality:** Git, GitHub, Pull Requests, Code Reviews, Debugging & Log Analysis, Automated Testing, Technical Documentation, Agile / Scrum
- **AI-Assisted Engineering:** Agentic Coding Workflows, Model Comparison (Quality, Cost & Edge Cases), Traceable & Auditable Code Delivery

PROFESSIONAL EXPERIENCE

Uitec — Full Stack Software Developer Trainee | Mar 2025 – Oct 2026

- Developed and maintained end-to-end web and mobile features using **React, React Native, Angular 15, JavaScript, and PHP 7**, delivering clean, scoped changes under senior code review.
- Built and consumed **RESTful/JSON APIs** with strict HTTP request validation, error handling, and data integrity.
- Designed relational schemas and optimized SQL queries in **PostgreSQL and MySQL** to improve application performance and reliability.
- Investigated, isolated, and resolved production bugs through technical log analysis, regression verification, and root-cause debugging.
- Collaborated in an Agile (Scrum) workflow using **Git** branches, pull requests, peer code reviews, deployments, and clear technical documentation.

SELECTED PROJECTS & AI-ASSISTED DEVELOPMENT

Raízes do Nordeste API — Backend Developer (Java / REST API)

- Designed and implemented a layered RESTful API for cultural cataloging, featuring structured routing, exception handling, and relational data persistence.

AI-Powered Job & Engineering Automation Workflows (Python, LLMs & Agentic Systems)

- Built and evaluated local and cloud LLM pipelines (comparing model quality, latency, cost, and failure modes on structured tasks) using agentic coding tools, automated test verification, and strict data governance.

EDUCATION & CERTIFICATIONS

Associate Degree (Tecnólogo) in Systems Analysis and Development — UNINTER (Jan 2024 – Jun 2026 | Completed)

Professional Certification in Java Software Development — Mesttra (Aug 2024 – Feb 2025) — Focus on Java, Spring ecosystem, Maven, OOP, and relational databases.

LANGUAGES

- **Portuguese:** Native | • **English:** Intermediate (technical reading, writing, and team collaboration)
